INTRODUCTION

As fraud and corruption risks are increasing, organizations are being forced to adopt new business practices while the focus on internal controls are being diminished. This is leaving many businesses exposed to emerging risks and significant potential financial losses. Statistically, organizations lose 5% of their revenue to the incidence of fraud and this is why the CFE Credential is important to members of your organization. The CFE credential helps in the end to end management of fraud risks and internal controls.

The Association of Certified Fraud Examiners (ACFE) is the world's largest anti-fraud organization and premiere provider of anti-fraud training and education. Together with more than 90,000 members, the ACFE is reducing business fraud worldwide and inspiring public confidence in the integrity and objectivity within the anti-fraud profession.

THE CFE QUALIFICATION

The Certified Fraud Examiner (CFE) credential denotes proven expertise in fraud prevention, deterrence, and investigation. CFEs are trained to identify the warning signs and red flags that indicate evidence of fraud and fraud risk. CFEs around the world help protect the global economy by uncovering fraud and implementing processes to prevent fraud from occurring in the first place.

CFEs have unique set of skills that are not found in any other career field or discipline; they combine knowledge of complex financial transactions with an understanding of methods, law, and how to resolve allegations of fraud.

The recognition and acceptability of the CFE credential is exceptional both in Nigeria and across the globe. As a CFE, you are part of a recognized group of anti-fraud professionals who are respected and whose opinions on professional fraud issues are undoubted.
